iUniverse, United States, 2008. Paperback. Book Condition: New. 228 x 152 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Most of us are users and providers of services. In spite of the predominance of services in modern society, we actually know very little about them -- no best practices, no principles, no theories. This book provides information on services for people in business, government, and education. If you want to have the competitive edge in your personal and professional life, then it is imperative to understand service science. Service in itself can be described as a client/provider interaction that creates and captures value, while a service system is defined as a structure of people and technology that adapts to the changing value of knowledge in the system. Combined, these two concepts form service science. Harry Katzan, managing editor of the prestigious Journal of Service Science and professor at a local university, takes a closer look at this newly emerging scientific field for academics and practitioners alike in Service Science. With an easy-to-understand format, Katzan, offers a comprehensive introduction to service science for people in business, education, and government. Useful as a textbook and a professional guide, this innovative study contains eight chapters that each end with a comprehensive summary, a list of key words, questions, and additional selected readings. In addition, Harry Katzan, Jr. provides concrete examples and in-depth discussion on such timely topics as: Service concepts Service systems Information services Service management Service business Service technology Service science has been touted as the up-and-coming discipline for the twenty-first century. Learn more about this exciting field and change how you think and perceive your world with Service Science!.
