Ancient Science Through the Golden Age of Greece

By George Sarton

Dover Publications. Paperback. Book Condition: New. Paperback. 688 pages. Dimensions: 8.3in. x 5.4in. x 1.4in. There are few scholars or scientists today who write as beautifully or as interestingly as Sarton . . . his book is magnificent. Ashley Montagu, Saturday Review Although science did not begin in ancient Greece (millennia of work in Egypt, Mesopotamia, and other regions preceded Greek efforts) it is nevertheless true that methodic, rational investigation of the natural universe originated largely with early Hellenic thinkers. Thus, the major part of this book is of necessity devoted to Greece. Drawing wherever possible on original sources, Dr. Sarton, one of the worlds foremost historians of science, paints a vivid and illuminating picture of mathematics, astronomy, physics, biology, medicine, and other sciences as they emerged from the mists of prehistory and ultimately flourished within the context of Greek society. The book is divided into three parts. Part One begins with the earliest evidence of prehistoric mathematics, astronomy, and other science. Dr. Sarton then describes the achievements of Egypt and Mesopotamia, the dawn of Greek culture and the remarkable flowering of Ionian science in the sixth century B. C. Thales of Miletos, Anaximandrox, and Xenophanes are among the important figures discussed....
