

A short course in the theory of determinants

By Laenas Gifford Weld

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 28 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1903 Excerpt: . . . D is called the discriminant of the given quadratic function, $ax^2 + by^2 + 2hxy$. The required conditions may now be stated as follows: The linear factors of a homogeneous quadratic function of two variables are real and unequal, real and equal, or imaginary, according as the discriminant of the function is less than, equal to, or greater than zero, respectively. The same conditions determine the nature of the binomial factors of the complete quadratic function of a single variable, viz. : $ax^2 + 2hx + b$, as may readily be seen by making $y = 1$ in the preceding case. 50. Let us now determine the condition which must be fulfilled in order that a homogeneous quadratic function of three variables may be resolved into two rational linear factors. Every such function may be written in the form $ax^2 + by^2 + cz^2 + 2fyz + 2gzx + 2hxy$. Placing this equal to zero...

Reviews

Absolutely essential read publication. it absolutely was writtern very completely and valuable. It is extremely difficult to leave it before concluding, once you begin to read the book.

-- **Sarai Lebsack**

Thorough guide for book enthusiasts. I am quite late in start reading this one, but better then never. Your lifestyle span will be transform when you total reading this article book.
